Education

UX Design Specialization - July 2021

Brain Station | Toronto, ON.

Honors Bachelor of Science - October 2018

York University | Toronto, ON.

Experience

Project Foremen - Eddy Solutions Inc. (Toronto, ON.)

February 2023 - Current

- Successfully managed complex, multi-phased network deployment projects, ensuring seamless transitions between project stages and maintaining quality and safety standards.
- Coordinated with various subcontractors, architects, and engineers to align project goals, specifications, and timelines, resulting in reduced change orders and delays.
- Utilized management software, such as Clickup, to streamline project scheduling, track progress, and facilitate better communication among team members.
- Implemented innovative technologies and automation in leak detection processes, reducing errors and increasing efficiency.

Lead Technician - Metropolitan United Church (Toronto, ON.)

June 2021 - Current

- Proficiently operated 8 PTZ cameras, utilizing a Blackmagic ATEM Television Studio Pro Switcher to seamlessly switch between camera angles, while also managing the display of captions through downstream green screens slides.
- Performed color correction, painted each camera and ensured all shots were properly focused and adjusted for optimal ISO levels.
- Gathered data, information and materials necessary to prepare for upcoming projects and deadlines by collaborating with a multi-disciplinary team.

Senior Audio Visual Technician - Grassby & Associates Inc (Richmond Hill, ON.)

March 2014 - 2021

- Project manager for audio/visual installations - Worked with clients to define goals and establish timelines for projects, organized site visits with contractors and clients, collaborated with team members to problem solve, trained new employees in audio system teching, set daily and weekly goals to ensure employees stayed within the time frame of project.
- Installed and configured over 100+ PTZ cameras, including all necessary software, to ensure optimal functionality and performance.

- Facilitated communication with clients and team members by sending daily and weekly updates on progress. This helped identify situations that needed problem solving and ensured management strategies were consistent with client's goals.
- Technical skills: Installing custom designed industrial audio and live stream systems in commercial buildings, cable running, soldering XLR connectors, and terminating network cables.

Supervisor/Lead Production Designer - SAVI Audio Visual Inc (Toronto, ON.)

November 2015 – 2022

- Managed and supervised crew of 20+ individuals in the setup/teardown and execution of various events, ensuring all aspects of production were executed with precision and attention to detail.
- Project managed TD and RBC Christmas décor installation. Ensuring that client designs and project goals were met. Meeting strict time restraints and ensuring team stayed on task via time management/task management techniques.
- Problem solved installation issues and ensured safety regulations were followed.
- Facilitated the setup and technical implementation of video walls across various events including music video shoots, commercial events, presentations and music festivals.
- Trained new employees on audio/visual systems, ensured equipment and inventory was delivered to job sites.
- Conducted site visits with clients to ensure seamless execution of events, while maintaining positive and productive relationships with clients through effective communication and attentive customer service.
- Main Skills AJA Recorder, Allen & Heath QU16, Blackmagic Video Switchers, Cat6 XLR SDI Termination, DiGiCo S21, ETC, Grand MA, Light Jockey, OBS, Power Distro, Projection Mapping, Resolume, Roland Video Switchers, vMix, Visual Effect Design, Yamaha QL1, Staging, Pipe & Drape.
